About Saksham

This is a unique customized course designed to strengthen the capability of organizations committed for a patient centered care. Course aims to build capacity of organizations and infuse process orientation, which enhances effectiveness of initiatives and delivers sustainable impact. This customized course facilitates organizations to create a long-term road map for organizations.

Course is structured in a way to guide and support organizations in their journey of creating a sustainable and lasting impact. It covers various key facets of organizational development and uses some of the most advanced management tools to address these

Key features of Saksham

- A first-of-its kind program designed for patient support groups and patient advocates
- Brings a unique opportunity to get mentoring from some of the best subject matter specialists and globally acclaimed faculties
- Interaction with leading domain experts
- Development of leadership skills & communication skills
- Opportunity to learn and share with other similar likeminded organizations and build alliance

Objectives:

- Short term & long term road map creation with clear outlined vision
- To strengthen organizational management, governance and leadership
- To train and mentor key staff in resource mobilization, strategy development, strengthen systems and processes for operations and Programme evaluations
- To improve the communication environment, internally and externally, appropriate to the strategy
