

PROGRAMME ARCHITECTURE

The GMP Academic Council has carefully crafted the curriculum keeping in mind the following:

- Courses that are fundamental to SPJIMR values, pedagogy and philosophy;
- Courses that are relevant to today's VUCA world;
- Courses that would make you future ready for the corporate sector;
- Courses that the partner schools would need for credit transfer.

There are 16 courses that are fundamental to SPJIMR – these are compulsory for all participants. From the list of electives, you will have to select 9 credits (excluding language). For participants joining European partner Schools after GMP, will have to take two credits for language courses (German, French or Dutch). For participants joining US partner Schools after GMP, will have to select 11 credits from the list of electives. The total credits for the GMP programme is 27. There are certain courses in the list of electives offered, which are compulsory for specific tracks. This will be communicated by GMP Office.

The courses that are mentioned over here are tentative and can change from time to time depending on inputs from GMP Academic Council and partner schools' requirements.

GMP programme is divided into three phases – Foundation Courses, Compulsory Courses, and Electives. Language classes (French, German and Dutch) are conducted for June intake. A representative programme architecture is given below:

Foundation	Compulsory Courses	Electives
Course Details	Course Details	Course Details
Case Study Method	Quantitative Methods	Business Analytics
Learning to Learn	Business Research Methods	Project Management
Science of Spirituality	Global Macroeconomics	Supply Chain Management
Business Communication	Design Thinking	Negotiations & Intercultural Management
Business Spreadsheet Modeling	Global Production Management	Start-up Garage
Microeconomics	Business Strategy	Digital Marketing
Personal Growth Lab	Marketing Management	Technology Strategy & Product Management
Financial Accounting & Statement Analysis	Decision Sciences	Responsible Management
	R and R Studio	iBizSim Business Simulation
	Management Accounting	International Business
	Corporate Finance	International Finance
		Report Writing and Presentation
		Strategic Finance
		Consulting Tools Seminar
		Language
6 Credits	10 Credits	11 Credits (US Partner School) 9 Credits + 2 Credits language (European Partner School)

Electives will vary depending on the specialization selected by the participants with their respective partner schools.

A mix of global curriculum and faculty, classroom sessions and non-classroom activities and simulations provide a diverse learning experience. Each course can be anywhere between 0.5 credit to 2.0 credits. Typically, a credit requires 16 sessions of 70 mins each. This is substantiated with pre-reading, post-reading, assignments, group work activities and tests, quizzes and exams.
