

Post Graduate Certificate in Advanced Project Management

hone your skills

...in Leadership & Strategic Business Management

In today's increasingly complex and competitive world, where business wants to accomplish far more with less, where projects are used as vehicle for implementing strategic initiatives and breakthrough products. There is an increasing demand on project managers. Completing a project and delivering it on time and within cost is no longer the only skill you are required to possess.

Research tells us that technical skill though are core to project management, companies are seeking additional skills in project managers in terms of leadership & strategic business management. Scenario demands that you as project manager are able to lead multiple teams and respective stakeholders through changes that are aligned with the strategic goals and objectives of your organisation and also helps organisation move to another level.

SPJIMR's "Certificate Programme in Advanced Project Management" program with the right mix of experiential learning and theory will guide you through the learning journey on how to excel in an environment where project-related decisions have long-term consequences for the project's stakeholders. The program will help you develop strategic perspectives, project planning, project portfolio management, project governance and cross-project leadership skills; to influence, to collaborate and effectively deliver breakthrough projects in a globally competitive world.
