

MANAGEMENT DEVELOPMENT PROGRAMME

Designing and Managing Tech-Enabled Supply Chains

Overview

Managing operations in a global supply chain is a complex and challenging exercise of managing and coordinating processes across organizations and value chain partners.

Aided by new-age technologies from AI to process automation techniques, we have new ways of dealing with these challenges and better matching supply and demand.

Managers operating in a competitive landscape must innovatively manage supply chains to generate higher value for the customers and higher surplus for the partners.

Who Can Attend?

Working professionals willing to develop competency in the domain of supply chain management from the ground up.

Key Topics Covered
