

MANAGEMENT DEVELOPMENT PROGRAMME

Invest smart — Application of value investing and valuation techniques

Overview

This programme is designed to build upon and enhance the existing knowledge of investment bankers, valuation professionals, and finance practitioners. It will help explore a wide range of contemporary quantitative and qualitative factors that are critical in assessing the true value and potential of publicly traded companies. This includes modern valuation techniques, financial statement analysis, macroeconomic considerations, industry dynamics, and company-specific performance indicators. The programme also addresses the evolving nature of investing by incorporating alternative approaches and emerging trends in equity valuation. In addition to technical skills, the course offers strategic insights for identifying growth opportunities across different sectors and market conditions. It's particularly valuable for investors seeking to refine or diversify their investment strategies—from conservative, long-term value investing to more active, opportunity-driven approaches.

Who Can Attend?

Finance professionals & enthusiasts
Self-directed investors
Risk-conscious investors
